

**SEG2105 Fall 2024 Project**

**Android Project: Rent Anything Mobile  
Application**

# Introduction

The **Rentify** App is a mobile platform designed to facilitate the rental of various items. It connects people who want to rent out their belongings (lessors) with those looking to rent items (renters). The app supports item listing, searching, and renting, creating an easy-to-use service for both parties.
